Brunhilde Vink
Senior Front-End Engineer

[E-Mail] [LinkedIn] [Github] [+31 (0) 6 30 222 952]

Hello, I'm Brunhilde, a senior front-end engineer based in the Netherlands. I specialise in crafting scalable and performant web applications specialising in ReactJS & NextJS. With a proven track record, I bring expertise in building exceptional user experiences.

WORK EXPERIENCE & PROJECTS

Front-End Engineer
Cliq (Via Bravoure)
Jun 2022 — Now

`ReactJS` `NextJS` `React Query` `Typescript` `E2E, Unit, Integration Testing`

- Leading front-end development of high-traffic video & live-streaming platform
- Successfully refactored legacy JavaScript codebase to TypeScript
- Implementing standard code paradigms for improved codebase maintainability
- Spearheaded and integrated E2E, unit & integration testing processes

Front-End Engineer
IO Digital
Nov 2020 — May 2022

`ReactJS` `NextJS` `GraphQL` `Apollo` `Typescript`

`E2E, Unit, Integration Testing`

- Built RINO, a secure and intuitive dashboard connecting medical students and professors, facilitating seamless message exchange, calendar management, and article access.
- Built thuisarts.nl, a Dutch government medical website, by spearheading the enhancement of an interactive information-gathering platform. Led a team in refactoring for better scalability and performance.
- Worked on the development of Pode, a sophisticated, high-performance e-commerce platform for luxury furniture, seamlessly integrated with a cutting-edge headless CMS.

Front-End Engineer
Yummygum
Mar 2020 — Aug 2020

`ReactJS` `VueJS` `GraphQL` `Storybook` `Typescript`

- Contributed to the renowned agency Yummygum in Amsterdam, renowned for crafting top-tier designs and high-performance websites. Collaborated on the development of Martin Garrix's official website, leveraging a cutting-edge headless CMS, React, and Next.js. Achieved seamless, top-quality animations using Framer, resulting in a flawless and exceptionally performant web application.

Front-End Engineer
Smartshore Ability
Apr 2019 — Apr 2020

`ReactJS` `VueJS` `PHP` `Laravel`

- Led the development of an accessible dashboard for Protestante Kerk Nederland, prioritizing dynamic messaging, real-time articles and information access. Seamlessly integrated colleague profiles and contact details into the platform, leveraging a headless CMS and PHP.
